Bilateral Meetings

- 2017. március 16. 15.00-19.00
- 2017. március 17. 10.00-15.00

Description

Subject: Agriculture; Animal Health; **proprietary feed additives production** and trade in Hungary and abroad.

Objectives: **To improve production parameters in industrial farming livestock** as well as the profitability. To reduce specific feed consumption and the resulting costs. **Prevention of health problems** in the stock and reducing costs and disruptions because of diseases.

Since: 2005 as self-employed with contract manufacturing. We operate as Ltd. since 2010.

Novelty: Vitamin and micronutrient supplements containing **active ingredients of herbs** - officially registered by the European Pharmacopoeia - **essential oil standardized for their agents in the amount of healing quantity for livestock.**

Niche: Our products are a lot more than just vitamins. The herb essential oil extracts we use in our products has already proved their efficiency in human therapy as alternative treatment and they work really well. These herbal remedies can prevent and cure animal diseases while they are not considered drugs. Therefore **no prescription** (freely distributable category) and **no withdrawal time** (that means: meat is suitable for human consumption even if the animal was slaughtered on the last day of the treatment).

Animals where Herbamix products are used: Horse, cattle, sheep, goat, pig, fish, poultry breeding flocks, laying hens, broilers, turkey, goose, duck, ostrich, pheasant, partridge, homing pigeons, ornamental poultry.
