THE DESIGN EXPERT

## INDUSTRIAL DESIGN

Our designers do not only put their whole heart into their work, but always utilize their acquired and constantly updated expertise when it comes to industrial design. **Modern production technologies do provide a wide range of possibilities** – which bring along **innovative industrial designs**. And we need to be attentive to and aware of these solutions to create something unique and new. Our creative processes are contoured with and led by well-founded theoretical knowhow.

**VIABLE CONCEPTS / EXPECTED & NECESSARY FUNCTIONALITY**

**INNOVATIVE DESIGN / ERGONOMICS / FEASIBILITY**

**PRODUCTION TECHNOLOGY / MATERIAL USAGE**

### PRODUCT DESIGN SERVICES

- \_ FREEHAND DRAWING
- \_ INDUSTRIAL DESIGN
- \_ 3D MODELING
- \_ RENDERING
- \_ PROTOTYPE PRODUCTION MANAGEMENT
- \_ PRODUCT PHOTO

---

- 01 / FIRST CONSULTATION
- 02 / BRIEFING
- 03 / CONCEPT
- 04 / 3D MODELING
- 05 / PROJECT MANAGEMENT
- 06 / DELIVERING RESULTS
- 07 / PREPARATION OF PROJECT PROPOSAL

## OUR CODE WORD IS EFFICIENCY

---

**Our processes** are designed in a way **to be measurable both in terms of time and costs**. We broke them down into **shorter phases**, so they can be monitored and reflected on throughout the project during our consultations. **We provide proactive suggestions** during the briefing phase, and we carry on with the implementation - based on the approved methods and parameters. Creativity and innovation walk hand in hand in our office - literally.

During the last decade **we have gained such expertise** that guarantees the outstanding quality of our work. **We cooperate with excellent partners**; therefore we always have someone to turn to, whenever we deem that new insight is needed. **Our purpose is to create such solutions and designs that nurture and contribute to the creative industry.**

We are aware of and we do utilize innovative materials that - **thanks to their unique attributes** - can cut back the costs of production. And we keep in mind that every material has its full life cycle - so, we consciously aim to make our designs viable, well-integrated in their environment, **in the most friendly way possible (renewal and recycling).**
